Configuration manual for software in your language with additional information can be found at https://mt.lv/help

If you need help with configuration, please seek a consultant https://mikrotik.com/consultants

First steps:

- Make sure your Internet service provider is allowing hardware change and will issue an automatic IP address;
- Connect your ISP cable to the first Ethernet port;
- Connect the device to the included power adapter;
- Connect your computer to the wireless network;
- Open https://192.168.88.1 in your web browser to start the configuration;
- User name: *admin* and there is no password by default (or, for some models, check user and wireless passwords on the sticker);

- Click the "Check_for_updates" button on the right side and update your RouterOS software to the latest version. The device must have an active Internet connection;
- The device will reboot;
- Connect again and choose your country on the left side of the screen, to apply country regulation settings;
- Set up your wireless network password, the password must be at least eight symbols;
- Set up your router password in the bottom field to the right and repeat it, it will be used to login next time.
